Ament of Pekin, China, a missionary of the American Board, writes concerning the political outlook:****SA "Pekin is plunged into the very pit of political monotony at the present time. The Russian Minister returns to St. Petersburg with his banners flying, having secured his country's influence for the future. Reform is a word not spoken now in the higher circles. The railroad is in Chinese hands, and is going on at the usual rate of progress. The foreign legations are closed, and the business must suspend operations on the bridge for some weeks. The so-called Reform Club has entirely suspended its operations with such no members and no leaders. Last week the government pays 10,000 taels a month to support this man of straw."****SA Two thousand rifles are bought at ruinous rates. Twice thousand guns came to the city a few days ago and are dumped in a godown to rust. To my mind, our great political needs are the destruction of the mandarins, making it possible for officials to be Christians without losing their rank. Christianity is tolerated among the people, but not among people of rank."****SA DEFIED THE C. L. The two were exonerated yesterday and the strike was suspended, but he was asked if his organization was suspended. He said the strike would not be ordered. The orchestra was not suspended, but it would go along with the decision to recommend a resolution to suspend the union, and by a large vote it was voted for a year.****SA USED AN UNDERTAKER'S WAGON.****SA A Dying Man Taken from the Hudson Street Hospital by His Relatives.****SA Antonio Jimenez, who was crushed between a car and the side of an entrance of the New York Central Railway freight depot, at Hudson and Laight streets, on Saturday, was removed from the Hudson Street Hospital to his home, at 121 Baxter street, in an undertaker's wagon yesterday morning.
